

Automatic
wrap toilet

New Release

When not in use.
It can be folded.

Automatic wrap toilet

wrappon · SUNNY

The toilet issue is one of the major concerns when going outdoors. Toilets!! Comfort, safety and security even in the great outdoors!

Recommendation

01

Use it anywhere

No water is used because the waste is sealed using heat compression. It can be installed anywhere by connecting it with a car DC cable.

*The unit comes standard with an AC power supply. *Can be connected using the optional car DC cable CA-50.

Recommendation

02

Lightweight and compact

The total weight is approximately 7.0 kg, making it lightweight and easy to move. It is small and easy to store.

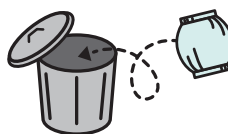

It doesn't take up much space and comes with a storage bag for easy transport.

Recommendation

03

Easy post-processing

The film used in these wrap bags is an environmentally friendly biodegradable film. The sealed wrap bag can be disposed of in the same way as a disposable diaper.

USE Easy to use

Add special coagulant

A special coagulant is administered and the excretion is completed. A coagulant is used to solidify the water in the excrement. Use.

Press the switch button

After excretion, press the switch button. The lap will start automatically. The film is fed automatically.

Remove the wrapped bag

After about 100 counts, the end sound (beep beep beep) When it beeps, the disconnection is complete. Remove the wrapped bag.
